PROFESSIONAL SUMMARY

Computer Science graduate and aspiring Software Developer with hands-on experience in Java, Python, SQL, backend development, and process automation. Experienced in supporting enterprise RPA solutions within a production environment while developing software engineering skills through academic projects and continuous learning. Passionate about building scalable applications, solving complex problems, and leveraging modern technologies to deliver innovative business solutions.

PROFESSIONAL EXPERIENCE

Automation Support Intern

Nedbank

06/2025 – 06/2026
Johannesburg

Provided production support for Robotic Process Automation (RPA) solutions by monitoring automated processes, resolving incidents, collaborating with business and technical teams, and ensuring the reliable operation of automation services. Utilized tools such as Control Room, ServiceNow, Alfabet, Microsoft Excel, and Microsoft Teams to support and improve automation performance.

EDUCATION

Software Development NQF Level 5

Dynamic DNA

06/2026
Randburg, Gauteng

- Developing skills in programming, software development principles, database development, system analysis and design, software testing, and the Software Development Life Cycle (SDLC).

Bachelor of Science in Computer Science

University of Venda

2025
Limpopo, South Africa

Core Coursework: Systems Analysis, Database Systems (MySQL), Data Structures and Algorithms, Java Programming, Machine Learning

TECHNICAL SKILLS

Programming Languages

Java, Python, Object-Oriented Programming (OOP)

Backend Development

Spring Boot, Django, REST APIs

Software Engineering

Git, GitHub, SDLC, Agile Methodology

Databases

MySQL, Database Design, SQL Queries

Automation & AI

Blue Prism RPA, Microsoft Power Automate, Generative AI

Problem-Solving and Computational Thinking

Debugging, Root Cause Analysis

CERTIFICATIONS & ACHIEVEMENTS

FNB App Academy

Enrolled

Currently enrolled in FNB App Academy, gaining practical experience in Mobile Application Development, software engineering principles, and application design.

GenAI for Software Engineers

Successfully completed specialized training focused on leveraging Generative AI within the software development lifecycle.

KEY PROJECTS

Home Affairs Online Booking System

Technologies Used: Java, MySQL, NetBeans, Visual Studio Code

- Architected and developed a full-stack application enabling users to seamlessly schedule appointments for public services.
- Designed and integrated a robust MySQL relational database to securely manage user profiles and system inventory updates.
- Implemented full CRUD operations to handle creating, viewing, updating, and canceling bookings smoothly.

Email Processing Automation Solution

Technologies Used: Blue Prism, Robotic Process Automation (RPA), Microsoft Outlook

- Engineered an automated RPA workflow that monitors incoming emails via Outlook for specific subject lines.
- Programmed the bot to automatically extract, download, and securely route email attachments to designated system folders.
- Optimized operational efficiency by eliminating manual data entry tasks and ensuring secure, compliant document handling.

Personal Portfolio Website

Technologies: HTML5, CSS3, Responsive Web Design

- Designed and developed a responsive portfolio website using HTML and CSS.
- Implemented responsive layouts to ensure compatibility across desktop, tablet, and mobile devices.
- Applied modern web design principles to create an intuitive and user-friendly experience.

PROFESSIONAL SKILLS & COMPETENCIES

- | | |
|---|--|
| • Advanced problem-solving, logical thinking, and critical analysis | • Strong technical debugging and system troubleshooting capabilities |
| • Excellent communication of technical ideas and user support | • Efficient time management and commitment to strict project deadlines |
| • Highly adaptable and fast learner with a passion for continuous professional development. | |
