PROFESSIONAL SUMMARY

Computer Science graduate with valuable experience in Robotic Process Automation (RPA) Support and a strong foundation in software development. Currently pursuing a Software Development NQF Level 5 qualification to further strengthen technical expertise and systems development capabilities. Passionate about engineering reliable, efficient, and scalable software solutions, solving complex programmatic challenges, and continuously learning emerging technologies. Proven ability to succeed within fast-paced, collaborative technical environments.

TECHNICAL SKILLS

- **Languages:** Python, Java, JavaScript, HTML5 & CSS3
- **Frameworks & APIs:** REST APIs
- **Automation:** Blue Prism, RPA Support
- **Tools & Methods:** Git & GitHub, OOP, Problem Solving

CURRENT LEARNING

- Software Development NQF 5
- FNB App Academy
- Git & GitHub Foundation

PROFESSIONAL EXPERIENCE

Automation Support Intern

2025 – 2026

- Provided high-quality production support for enterprise Robotic Process Automation (RPA) solutions.
- Monitored bot performance metrics continuously to ensure stable execution and optimal runtime.
- Investigated incidents, performed root-cause analysis on technical exceptions, and resolved automation failures swiftly.
- Ensured robust business process continuity and reduced manual intervention through robust support workflows.

KEY PROJECTS

Home Affairs Online Booking System

- Designed and developed a secure, Java-based web application to streamline the appointment booking process for Home Affairs, significantly improving user accessibility and scheduling efficiency.
- Engineered robust CRUD operations for seamless appointment lifecycle management and architected a relational MySQL database to ensure data integrity and secure storage.

Tools: Java, MySQL, NetBeans IDE, Git & GitHub

Email Automation Solution

- Developed an automated email infrastructure to seamlessly distribute personalized communications to designated recipients.
- Significantly reduced manual administrative overhead and improved message delivery workflows.

Tools: Blue Prism, Microsoft Outlook, SMTP Protocol

Professional Portfolio Website

- Designed and engineered a fully responsive personal web application to highlight academic background, engineering competencies, and certifications.

Tools: HTML5, CSS3, JavaScript, Git, GitHub, Visual Studio Code

EDUCATION

Software Development NQF Level 5

Dynamic DNA Academy
2026 – Present

Bachelor of Science in Computer Science

University of Venda | 2025

Focus: Data Structures & Algorithms, DBMS, Software Engineering, Systems Analysis & Design

CERTIFICATIONS

- GenAI for Software Engineers
- Digital Learning Programme
- Entrepreneurship Course
